(54) COMMODITY DISPLAY RACK DEVICE OF SHOW CASE

(57) Abstract:

PROBLEM TO BE SOLVED: To improve the support structure of a rack bracket to smoothly put in and out a movable rack plate of a drawer type commodity display rack.

SOLUTION: The drawer type commodity display rack 7 comprises a rack bracket 8 with a pair of right and left slide rails 8a horizontally locked and supported on rack supports 10 erected at both right and left ends in the storage side by side with inner box back panels 1a of a case main body with rear end clicks 8b hooked in square holes, and a movable rack plate 9 stretched between the right and left rack brackets and guided and supported to be drawn forward along the slide rails. The rack bracket is provided with a leg piece 8c bulged from the base of the bracket to the side as an oscillatory stop means to be pressed to the front of the back panel. Thus, in putting in and out the movable rack plate, the rack brackets can be

prevented from being swayed right and left so that the rack plate abuts on the side walls 1b of the case main body to be rubbed.
